Subject: RE: Deschutes Advisory Group: Oct. 30 Meeting

All:

A draft of the Deschutes River TMDL is now available for review by the advisory committee. It is available on our ftp site at <ftp://www.ecy.wa.gov/wq/DeschutesTMDLdocs>. I will have a very limited number of hard copies at the meeting on Thursday morning (Oct. 30, 9-12, Tumwater Fire Department). We will present the TMDL and discuss significant findings at the meeting. By next week, we will set a deadline for your comments on the draft TMDL – stay tuned for the details.

Subject: Deschutes Advisory Group: Oct. 30 Meeting

All:

We are having a meeting of the Deschutes Advisory Group on Thursday, October 30. It will be from 9:00 to noon at the Tumwater Fire Department (311 Israel Rd. SW, Tumwater).

Over the last few months, we have been writing a draft of the *Deschutes River, Percival Creek, and Budd Inlet Tributaries Temperature, Fecal Coliform Bacteria, Dissolved Oxygen, pH, and Fine Sediment Total Maximum Daily Load* (TMDL). That draft TMDL is almost ready for your review. We may or may not have the actual TMDL document ready for your review next Thursday depending on our schedule, but we will be ready to share all the details of what will be in the report. Once the draft is done, we will send a copy of the draft report to everyone to get your comments.

At the meeting on the 30th, we'll walk through each section of the draft TMDL and answer questions.

Note that this TMDL does not include Capitol Lake and Budd Inlet – that part of the watershed will be addressed in the next phase of our work.

If you have any questions, please contact Lydia Wagner (LBLA461@ecy.wa.gov or 360-407-6329) or me. We have more TMDL information on our website at <http://www.ecy.wa.gov/programs/wq/tmdl/deschutes/index.html>.

Sincerely,

Andrew Kolosseus
